LongAxis recommendations

- Recommended Computer specifications:
  - RAM: *16GB or more*
  - CPU: *Intel i7-6700K Processor (4.00 GHz)*
  - GRAPHICS CARD: *NVIDIA GeForce GTX 980 Ti*
- Suggested MATLAB version 2016b, 2017b, or 2018b.
  - *Image Processing Toolbox*

LongAxis installation instructions

- Download zip file *Longaxis_Package*, and unzip into a folder.
  - Zip file should contain the 6 files listed below:
    1. longaxis.m
    2. SelectFile.m
    3. PopOut1.m
    4. IndexInputWindow.m
    5. IndexOutputWindow.m
    6. CoherenceFilterStep2D.c
- Add the folder, containing these 6 unzipped files, to the MATLAB path.
- Type *longaxis* at the MATLAB prompt to start program.
